# TYPICAL ANALYSIS

## Tasco®

<b>Typical Composition</b>	
AOS Related Polysaccharides	52.0%
Alginic Acid	25.0%
Mannitol	5.0%
Laminarin	3.0%
FCP (Fuco­se Con­tain­ing Sul­fated Polysaccharide)	15.0%
Other Carbohydrates	4.0%

<b>Other Proximate Constituents</b>	
Crude Protein	Min 4.0%
Crude Fat	Min 2.0%
Crude Fiber	Max 8.0%

<b>Macro Minerals</b>	
Potassium (K)	Min 1.5%

<b>Trace (Micro) Minerals</b>	
Sodium Chloride (NaCl)	Max 9.0%
Iodine (I)	Min 500 ppm
Iodine (I)	Max 1,000 ppm

This product is a 100% natural organic marine algae product. Although certified laboratory analyses are obtained, they may vary slightly from the typical analysis due to naturally occurring fluctuations in the seaplant due to time of year, geographical location, plant life cycle, nutrient availability due to tidal conditions and tide flow. The analysis presented above is based on long-term sampling and statistical analysis and is believed to be accurate and reliable. However, Acadian Seaplants Limited makes no warranty; either expressed or implied, and assumes no liability for this information and the product described herein. This information is not provided as conditions of sale.
